5 CENTS A COPY

## Vice-Regal Visit

In uniform for the first time since arriving in Canada, His Excellency, Major-General Sir Eric of Athlone, Governor-General and Commander-in-Chief, shown at left, visiting Alberta's headquarters at Ottawa. He was received by the Chief of the Air Staff, Air Commodore Lloyd S. Breden, D.S.O., with whom he is staying during the course of his visit. During the visit His Excellency was accompanied by his private secretary, Sir Shuldharn Redfern and an aide-de-camp, Capt. T. R. C. Goff.

## LOCALS

Excavation work was commenced Monday morning on the new school building.

Mr. and Mrs. J. Crocker returned Saturday from a two weeks' trip to the Pacific Coast.

Mrs. Vivian Heather of Calgary is visiting at the home of her cousin, Mrs. J. H. Robison this week.

A dance will be held Saturday evening July 27 in the U.F.A. Hall by Hugh Grieve.

Mrs. James Mitchell and daughter of Nordegg, Alberta, are visiting at the home of Mrs. Miles Fike.

Miss Gladys Brown of Brandon, Man., is the guest of Mr. and Mrs. T. Mair and family.

Complimentary to Mrs. James Mitchell, who is her guest, Mrs. Miles Fike entertained at a delightful afternoon tea on Tuesday.

Misses G. Hunt and E. Belshaw returned home Saturday after spending a couple of weeks' delegates to the C. G. I. T. Camp at Sylvan Lake.

Mr. and Mrs. T. Tredaway and two daughters, the Misses Winifred and Edna, left by motor during the week-end for a holiday trip to the coast.

Since July 1st, 6 inches of rain has fallen in this area, Crossfield. Crops are forging ahead as far as growth is concerned. Hay crops are now being held up by the rain. We have ample moisture now to see the crops through. Some light falls of hail are reported with slight damage. Side roads are heavy and in some cases impassable.

## LOCALS

Warren Hall and Jack Fleming, left today for Lesser Slave Lake, where they have obtained positions.

Mr. and Mrs. W. Hurt returned home Wednesday after a week's holiday in Banff.

A McMillan, the local Pool Elevator agent is back on the job after a few days holidaying at Banff.

The Native Sons and Daughters will hold their annual picnic on Wednesday, Aug. 7th at Bowness Park, Calgary.

Miss Elaine Belshaw left Monday morning for Olds Agricultural School, where she will attend the short course won in connection with the local School Fair last September.

Shortly after midnight Monday Crossfield was visited by a severe electric storm and heavy rain, with further rains on Tuesday and Wednesday afternoon. No reports of hail have reached us and crops are in excellent shape.

Miss Lillian Peel of Swift Current, Sask., who has been holidaying in Calgary, arrived Monday to visit at the home of her sister, Mrs. C. A. Marshall. Receiving word of the serious illness of their father, Miss Peel and Mrs. Marshall left for Swift Current on Wednesday.

The visit of the Calgary Board of Trade to the local Board, which was planned for Wednesday was postponed indefinitely. Arrangements had been made to visit some of the ranches and farms in the district during the afternoon with a picnic in the park in the evening but Tuesday's rains left country roads in poor shape.

## Penchants Decide Air Force Vocations

No man entering the R.C.A.F. knows what he will become. Special qualifications may indicate that he is best fitted to be a pilot, a wireless operator or any of the varied specialists of a modern air force, but the Force makes the decision. As a recruit progresses from the Manning Depot along through the initial training school and other phases of training, officer-instructors note his talents and decide for which particular job he is best adapted.

## Observer Is Versatile Fellow

The modern air observer is one of the most highly trained men in the Royal Canadian Air Force. He is a meteorologist, a compass and instrument expert, a photographer, an air analyst, a signaller, a score of other things. He is trained to spot, perhaps miles below him, the unusual or suspicious which may hide enemy presence. He has all the knowledge of a pilot, plus the matters of his distinctive, important field.

## Fish To Fry

More than 90,000,000 fish fingerlings try eggs, have been placed in Alberta lakes and streams since the beginning of 1939, it was announced by Hon. D. B. Mullen, Minister of Agriculture, under whose department the fish and game branch carried out the task. "At Lesser Slave Lake, the department operates one of the largest fish hatcheries on the continent," said Mr. Mullen. An aerated tank truck is used in transporting the fish. Most modern obtainable, it has travelled 12,000 miles since its purchase in 1939.

## 348 Hours To Become Observer

The number of hours necessary for the training of one R.C.A.F. observer illustrates the highly specialized nature of modern air force instruction. The student is confronted with the following schedule for academic studies:

Dead Reckoning, 102 hours; Compass, 35 hours; Instruments, 15 hours; Maps and Charts, 18 hours; Mathematics, 22 hours; Direction Finding Wireless Telegraphy, 10 hours; Photography, 20 hours; Reconnaissance, 15 hours; Flying Exercises, 50 hours; Air Analysis, 19 hours; Meteorology, 22 hours; Signals, 20 hours.

## Hamilton Brothers Have Eventful Reunion

Hamilton brothers meet after a lapse of 50 years. While touring through Montana, Alex Hamilton well known in Calgary and district, accidentally met his brother Guy, who he had not seen for fifty years. After talking over the years gone by and getting acquainted again, the two brothers came to Alberta to visit another brother Linus Hamilton whom they had not seen for 30 years, and who is now residing at Dovercourt, Alberta. While in Alberta, they visited friends at Dog Pound.

## LOCALS

Mr. and Mrs. H. Meyers, of Polson, Montana, were recent visitors at the home of the former brother Ed. here. On their return home Ed. accompanied them as far as Banff.

The Chronicle will have next week for distribution, a number of booklets profusely illustrated with pictures of fighting forces now engaged in the present war.

The 24 page booklet entitled "Neptune", contains illustrations of German naval units which have been sunk or damaged, methods used to cope with mines, a map of British aerial penetration into Germany, and many more pictures of interest, highlighted by a beautiful 10 by 13 picture in color of British bombers taking off for a night raid on German air bases.

The booklets, are sent out by the British Ministry of Information. You can get a copy free if you call at the Chronicle office next week.

## Very Convenient

A socially prominent woman came to the bank and announced that she wished to open an account. The bank was delighted, and much time was spent in signing cards, selecting check books, and finally she was asked about the initial deposit. "Oh, I do not wish to bother to make deposits," she said, "just charge the checks and send me a bill each month as the department stores do."

## You Can Assist

The Chronicle is anxious to publish all the news it can. We feel that our readers can help us by sending in items like Personal Reports of Social Affairs, and other activities. One item alone may seem too small to bother with, but when added to others helps make interesting news of the "doings" of our community. May we have your co-operation.

## CALL FOR STEPS CHECK ACCIDENTS

Need of police authorities checking up on careless and reckless drivers has been emphasized by the Alberta Motor Association.

This matter was discussed at a recent meeting of directors of the A.M.A., when it was decided to again call upon the provincial authorities to check over old cars operating on the highways.

During the discussion it was stated that at Calgary 7 accidents daily had been reported indicating there was need to enforce greater safety measures.

While stringent action is taken by the provincial authorities against persons driving a car while intoxicated, it appears that more rigorous steps are required.

It is a fact that some 500 persons in this province are legally barred from driving a car, due to convictions or the inability to obtain protective motor car insurance.

Nevertheless, it is believed that with a tightening up of inspections of old cars, much can be done to reduce the accident toll.

Recently it was revealed that in a fatal accident occurred in an Alberta city in recent weeks, the car was in a defective condition having poor brakes and a dirty windshield.

## Red Cross Society

Alberta Red Cross volunteer workers are maintaining their vigorous stride in war work. Since February 1st their contributions to date of July 18th have enabled Divisional Headquarters to ship 1,396 cases of surgical, soldier, and refugee supplies Overseas.

Included in this grand total were 77 cartons containing 2,614 blankets, 173 cases containing 183,306 surgical dressings, 516 cases containing 153,705 articles of soldier supplies, and 28 cases carrying 9,720 articles for refugee relief.

Workmen painting the Canadian coat of arms over the main entrance at the Canadian Red Cross Hospital for sick and wounded in England.

Farmers who are not already provided with ample grain storage facilities on their farms should get busy and provide substantial storage bins that will accommodate their entire grain supply.

Export shipments will be small until conditions change, and it looks like the farmer will have to see that his grain is housed on the farm so that it will be well protected from the elements during the fall and winter.

Some scheme will no doubt be forthcoming from the government regarding some advancement on grain housed on the farm. This would tide over the farmer with a little cash until grain movements become more normal.

### Captain Woodside Appeals For Recruits

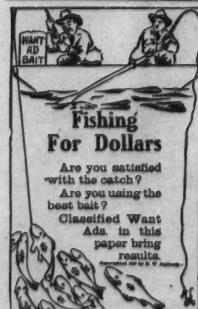

An appeal for men to join the non-permanent active militia, and for employers to encourage their workers to do so, was voiced by Captain D. H. Woodside, D.A.A.G., at Military District 13 headquarters.

Capt. Woodside pointed out that membership in the militia will entail attendance at camp for two weeks in September. On the other hand, however, each class under the compulsory service scheme will train in camp for 40 days approximately six weeks.

"This means that an employer will be without the services of his staff for six weeks. If the members of his staff have voluntarily joined the militia he will be without their services for two weeks" the staff officer said.

"Canada is now turning out some of the finest war equipment in the world. She is at war. She may need this material for her own defense, but the best equipment in the world will be no good to her if she has no men trained to use it."

"Planes, tanks, artillery, automatic rifles must have men trained to use them and every fit man in Canada now has an opportunity to get that training, to equip himself for the protection of his home ideals and everything he holds sacred," Capt. Woodside declared.

### Proposals To Meet New Crop Problems Sent To Ottawa

#### Line Elevators Set Forth Storage, Finance Plans

Proposals made to the Dominion Government by Line Elevator Companies to meet the problem of storage and financing of the 1940 wheat crop were made public this week by G. W. P. Heffelfinger, president of The North West Line Elevators Association.

In a communication to the Minister of Trade and Commerce, the Line Elevators point out that they are gravely concerned as to what measures may be adopted to take care of the situation that will develop this season through inability of farmers to deliver their grain, due to congestion that will in all probability arise shortly after the commencement of the movement of the crop.

In regard to storage the Association sets forth that the farmer who cannot get his grain into a marketable position will be faced with continuing charges on his financial obligations and it is therefore urged that in the formulation of such a policy and procedure due regard to that important fact be recorded in an increased price based on time of delivery.

Concerning financing the crop the Association points out that in

the past, the elevator trade through arrangements with the banks have financed the movement of farms through their elevators and they are in a position to continue to do so, but the position of the farmer who is unable to get his grain into an elevator that he can dispose of it or secure an advance, commands immediate attention and the formulation of a policy by the Government before the crop commences to move.

The Association proposes to the Government that any farmer who has his grain properly binned on the farm would have the right to apply to the Municipal Officer for an advance at a minimum interest rate. The Municipal Officer would carefully examine the bin, satisfy himself the grain was in sound keeping condition, determine the approximate bushels and issue a cash voucher to the farmer of a stated amount per bushel.

The banking facilities of the elevator companies could be used for the cashing of the vouchers and these advances would in turn be honored on presentation by the Wheat Board.

This voucher form would be so worded as to constitute a contract between the farmer and the Government, obligating the farmer to deliver the wheat at a designated station either prior to or upon instructions from the Municipal Officer the loan being a first charge on the grain.

"We are giving but a brief outline of a plan but we are prepared to go into the matter in detail if you consider it will suit the Government's purpose, and we hasten to assure you of our desire to be helpful in the formulation of any other plan you may care to discuss with us," the communication said.

### The World of Wheat

By H. G. L. Strange

The "Crop Testing Plan" which is now busy with its tenth year of work, will test for trueness to variety and for content or absence of mixtures, some 20,000 individual farmer's fields of wheat.

At the first field day held this year in Manitoba, one farmer submitted a sample which he declared was pure Thatcher, and he had purchased this seed, and sown it on a large acreage so that he would not suffer any more losses from rust. The sample turned out to be pure Reward, which is not resistant to rust. If the farmer had not submitted this sample to the "Crop Testing Plan", he would have received the same seed next year, and should next year be a rust year then unquestionably the farmer would stand to lose many hundreds of dollars.

"The Crop Testing Plan" has saved untold numbers of farmers from similar money losses during the past ten years; for it has been found that 18 percent of the samples submitted for testing proved on analysis to be entirely different varieties than the farmers thought they were producing.

I strongly recommend farmers who can do so to attend one of the many "Crop Testing Plan" field days now being held throughout the West, and see this work with their own eyes.

Following factors have tended to raise price: No improvement is reported in new crop prospects in Australia and rain is still needed -- It has been estimated that 1940 European wheat crops will be 340 million bushels less than in 1939 -- The acreage planted to soybeans in Manchuria is 15 to 20 per cent. below last year.

Following factors have tended to lower price: Harvesting in Russia is proceeding actively under favorable conditions -- Corn crop prospects in Italy have been improving -- Beneficial rains have been received in the U. S. spring wheat belt -- The United Kingdom has made an agreement to take 78,400,000 pounds of Canadian cheese.

### Stage Coach

Shades of the early West and Dearborn, Michigan, will be disturbed by a request from an official at Jasper Park for an oldtime three seated democrat or stagecoach. If and when found, the vehicle will be put into service, carrying passengers between Medicine and Maligow Lakes. Edmonton officials, to whom the request was addressed, are canvassing possibilities in this section.

### Status Quo.

Statements of representative elevator companies show total storage earnings of two and two-thirds cents per bushel on Board wheat, declared G. W. P. Heffelfinger, president of the North West Line Elevators Association in a recent appearance before the Board of Grain Commissioners. Mr. Heffelfinger defended the present rate of one cent per bushel

**Farm Storage****Important****ALBERTA WHEAT POOL**

It is feared that many Alberta farmers do not fully realize the seriousness of the congestion now existing in grain storage. It is a certainty that before harvest proceeds very far this coming autumn what elevator space is left will be completely plugged. Every farmer should make plans to provide all the farm storage he possibly can.

The terminal elevators on both Atlantic and Pacific seaboards, as well as terminals on the Great Lakes and also in the interior, are pretty well loaded with wheat and other grains at the present time. The surplus grain is backed up into country elevators, which is an unprecedented state of affairs.

Whatever the federal government may do will not relieve the storage congestion. The great bulk of the grain that will be threshed this fall will have to be retained on farms. In order to prevent damage and loss every effort should be made to provide as much safe farm storage as possible.

It is apparent that it may be impossible to market grain in poor condition, and this is a phase that should not be neglected.

It won't be long now before harvest is here and the least possible delay is desirable in developing farm storage plans.

**Bull Exhibit**

Visitors to the Edmonton Exhibition last week were given the opportunity of inspecting the fine young purebred bulls which the provincial Department of Agriculture exchange for scrub animals. Facilities were provided to give full information to visitors, all of whom commented favorably on the splendid animals.

"The bull exchange policy has been one of the most popular live stock improvements policies ever to be set up in Alberta" said Mr. D. B. Mullen, Minister of the department. "About 600 purebred bulls have been handled since it began."

**TO BE RELIED ON**

In long experience with United Grain Growers Limited in selling their grain and in buying farm supplies, not only shareholders but all farmer customers have learned that this is an organization that can be relied on.

Both the Company's facilities and its purpose to give the best possible service to farmers are unsurpassed.

**Household Hints**

We crave cooling drinks during warm weather. Few of us realize that this craving is really the body's demand for more liquid to take the place of that lost through perspiration. The hotter the day and the more active we are, the more we feel a desire for something cold and refreshing to drink. We are indeed wise if we heed the warning and furnish liquid liberally to our bodies.

Fruit salads, fruit cups and fruit desserts give us a great deal of liquid in a very pleasing form. Iced tea with liberal quantities of lemon juice is another ideal medium for securing liquid.

But on hot days we cannot limit our liquid intake to mealtime. We want a cooling glass of lemonade once or twice during the day. Or we may prefer orangeade, a fruit juice or a ginger flip.

Lemons blend with almost anything used as a summer beverage. Despite their acid taste, lemons produce an alkaline reaction in the body. They contribute to the needed mineral supply of calcium, phosphorus and potassium. They stimulate the appetite, promote digestion and serve as a non-habit forming regulator.

So here are a few healthful summer thirst quencher suggestions.

**Lemon Ginger Flip**

1 lemon, extract juice  
1-2 orange, extract juice  
Sugar to taste  
Crushed ice to fill 1-2 glass  
Combine and fill glass with

Ginger Ale

Add: A bit of shredded yellow peel from lemon

**Golden Gate Punch**

3-4 1 cup sugar  
1-2 cups lemon juice  
1 cup orange juice  
2 cups grape juice or juice from  
any berry  
6 cups water

Ice

Combine. Garnish with lemon slices. Serves 10-12.

Lemon Fizz: Make a lemonade with carbonated water.

Lemon Float: Add a bit of Lemon Sherbet to Lemonade.

Lemon Shake: Shake together well: 1-4 cup sugar, 1-4 cup lemon juice, 1-2 cup milk, 1-2 cup crushed ice (4 ice cubes).

**Grasshopper Army**

Feared invasion of grasshoppers beyond the south-east corner of Alberta has not materialized, according to O. S. Longman, Provincial Field Crops Commissioner. The expected threat was halted by favorable weather. In an effort to combat the pests the Provincial Department of Agriculture has sent out 200 car loads of poisoned bait to the infested areas in south-eastern Alberta.
